1. Getting Started

BOLO is a lightweight task delegation app built around one idea: creating and tracking a task should take seconds — including by voice. This guide walks through every screen exactly as it behaves in the current build, with real screenshots taken directly from a live walkthrough, so what you read here matches what you'll see on your own screen.

1.1 Logging In

BOLO uses Email + OTP login — there is no password to remember or reset.

1. Open the BOLO link provided by your institution or firm.
2. Enter your registered email address.
3. Check your inbox for a one-time code (OTP) and enter it on screen.
4. You'll land on the Voice Home dashboard once verified — this is your home base for everything in the app.

Good to know: Once logged in, you stay signed in until you explicitly log out. There is no need to re-enter an OTP every time you reopen the app — this matters if you're switching between desktop and mobile browser sessions during the day.

2. The Voice Home Dashboard

Voice Home is the screen you land on after login, and it's the default screen the left sidebar always returns you to. It's deliberately built around a large microphone button in the center of the screen — voice is meant to be your primary, fastest way of working, though everything is also fully usable with just a keyboard and mouse.

The Voice Home dashboard — your landing screen after login.

2.1 What's on this screen, piece by piece

- Top bar (far left): a global search box — "Search tasks, notes..." — that searches across everything you have access to, plus a small mic icon inside the search box itself for voice search.
- Top bar (center-right): three live counters — Tasks Open (shown as a fraction, e.g. "1/5" meaning 1 of 5 open tasks needs attention), Overdue, and Due This Week — so you can gauge your workload without opening any list.
- Top bar (far right): the notification bell (with an unread-count badge) and your profile photo/name with your role shown underneath it (e.g. "Faculty").

- Left sidebar: Voice Home (always takes you back here), + Create Task, then your three task views — Assigned to Me, Tasks Delegated, Due This Week — each showing a live count badge. Below that, Labels (with an "Add new label" shortcut), and finally Sticky Wall and My Broadcast Notice under a Workspace heading.
- Center panel: today's date and time, a Live Transcript box that fills in as you speak, and an "Action taken" box directly below it that shows exactly what BOLO understood and did with your command.
- Right panel: a live preview of your Sticky Wall and your Notice board — both visible at a glance without leaving the dashboard.
- Bottom center: the microphone button itself, with five example prompts shown above it as tappable shortcuts — "Assign Rohit", "Show overdue", "Mark complete", "Create task", "Show my tasks" — a quick way to learn the phrasing BOLO expects.

Language support: The text next to the mic explicitly states: English, Hindi, or Hinglish works. If your rollout needs another language (for example Marathi for a Maharashtra-based CS firm), confirm support with the development team first — it isn't listed as supported in this build, so treat any result as unverified rather than assuming it will work reliably.

3. Using Voice — the fastest way to work in BOLO

3.1 Starting and stopping the mic

- Click the microphone button, or press and hold the Space bar, from almost any screen in the app.
- Speak your command naturally, at a normal pace — e.g. "Assign Rohit to submit the audit report by Friday, high priority."
- Release the key or click again to stop listening. Your words appear word-by-word in the Live Transcript box as you speak, and the Action Taken box updates to show what BOLO understood and did.

3.2 What you can do by voice

- Create — a task, a sticky note, or a broadcast, by describing it in one sentence.
- Act on existing tasks — mark something complete, reassign it, or check its status, using natural phrasing rather than a fixed command syntax.
- Navigate — say something like "show overdue" and BOLO jumps straight to that filtered view, saving you the clicks through the sidebar.
- Search — describe what you're looking for in plain language and BOLO surfaces matching tasks, similar to typing into the search box but hands-free.

Where voice does not work: Voice input is intentionally turned off on the Notifications screen and the Settings screen. If you press Space or tap the mic there and nothing happens, that's expected behavior, not a bug.

A small gotcha worth knowing: The Space bar is a global shortcut for the mic almost everywhere in the app — including, in some cases, while typing inside certain form fields that aren't a standard text box. If you're typing a note or description and a space bar press unexpectedly starts a voice recording instead of adding a space, click directly inside the text field first to make sure it has focus before typing a sentence with spaces in it.

4. Creating a Task (Manual Entry)

Click "+ Create Task" in the left sidebar at any time to open the task creation form shown below.

The Create Task form, with the two required fields (Task Title, Assignee) marked with a red asterisk.

This is the exact set of fields in the current build:

Field	Details
Task Title *	Required. Limited to 50 characters — keep it short and specific, since there's a separate Description field for detail.
Assignee *	Required. A searchable dropdown of faculty/staff — start typing a name to filter the list.
Label	Optional. Pick an existing label (see Section 11) to group this task with related work.
Due Date	Optional, but strongly recommended — without it, the task won't appear in Due This Week or trigger overdue tracking.
Time	Optional. Pairs with Due Date for a specific deadline time, not just a date.
Priority	Optional dropdown (e.g. High/Medium/Low), used for sorting and the color-coded dot shown in task lists.
Evidence Required	Optional checkbox. If ticked, the assignee will need to attach a file as proof before the task can be marked complete — useful for anything that needs documentary proof, like a filed compliance form.
Description	Optional free text, up to 1,000 characters, for any detail that doesn't belong in the title.
Attachment	Optional file attachment you can add at creation time (below the Description field, off-screen in the image above).

Once you've filled in at least the Title and Assignee, the "Review & Create" button becomes active (it stays greyed out until both required fields are filled). Click "Cancel" at any point to discard the draft without saving it.

5. Managing Tasks — Delegated, Assigned to Me, Due This Week

These three sidebar links are how you'll spend most of your day-to-day time in BOLO once tasks are flowing. Each one answers a different question.

5.1 Tasks Delegated — "What have I assigned to others?"

This view has two tabs:

- Needs Attention — a shorter list of only the tasks that require some action from you right now (for example, something overdue or awaiting your review).

- All Tasks — the complete list of everything you've delegated.

Tasks Delegated → Needs Attention tab. Note the color-coded dot before each task title (red = overdue, green = on track).

Tasks Delegated → All Tasks tab, showing all four columns: Task, assignee (with photo), latest comment, and due date.

Each row shows the task title, a status tag underneath it where relevant (e.g. Cancelled, Awaiting Review), the assignee's photo and name, the most recent comment posted on that task (or "No update yet"), and the due date with its urgency clearly color-coded — red for Overdue, orange for Due Today. A small bell icon next to overdue or urgent rows lets you send the assignee a quick reminder without opening the task at all. Click the chevron (v) on the right of any row to expand it inline, or click the task title to open the full Task Detail view.

5.2 Assigned to Me — "What has someone assigned to me?"

The mirror image of Tasks Delegated: everything assigned to you by someone else, grouped by who assigned it. This is where you'll spend time updating progress and marking your own work complete.

5.3 Due This Week — "What's on my plate this week, from either side?"

Due This Week — a combined view of everything due in the next 7 days, whether you're the Assignee or the Assigner on it.

This is a rolling 7-day view — the header shows the exact date range currently in scope (e.g. "03-Aug-2026 – 09-Aug-2026") so there's no ambiguity about what "this week" means. Usefully, this view mixes tasks from both directions: notice how each row is labeled Assignee or Assigner underneath the person's name, telling you at a glance whether you're the one who has to do the work or the one who delegated it. You'll also see status tags here beyond the simple Overdue/On track dots — for example "Done (A)" appears when a task has been marked complete by the Assignee (matching the DoneA state from the underlying task lifecycle).

6. Filtering Tasks

Click the "Filter" button available at the top of Tasks Delegated (and similar list views) to narrow down a long list.

The Filter panel — narrow any task list by Assignee, Priority, Due date range, or Label.

The filter panel lets you combine up to four conditions at once:

Field	Details
Assignee	Dropdown defaulting to "All Assignees" — narrow to one specific person's tasks.
Priority	Radio buttons: All / High / Medium / Low.
Due	Radio buttons: All / Overdue / Today / This Week / Custom Range — Custom Range lets you pick any specific date span.
Label	Dropdown defaulting to "All Labels" — narrow to one label/category of work.

Click "Apply" to run the filter, or "Reset" to clear everything back to the default (unfiltered) view.

7. Task Detail — Fields, Status, and Actions

Click any task from a list to open its detail view. What you're able to do here depends entirely on whether you're the Delegator (the person who assigned it) or the Assignee (the person it's assigned to) — BOLO shows a different set of action buttons to each.

7.1 What's shown, regardless of your role

- Title, a status tag (e.g. Awaiting Review), Assignee, Label, Due Date, and Priority — all in a row of fields near the top.
- Progress Updates — a running comment thread. Important: once a task reaches Awaiting Review, this thread locks, and you'll see the exact message "This task is awaiting review — comments are locked" instead of a comment box.
- Sub-tasks — listed with their own assignee, status, and due date, nested inside the parent task. A sub-task's due date is enforced to fall before its parent task's due date, so you can't accidentally schedule a sub-task after the deadline it's meant to feed into.
- Attachments — any files attached to the task, with a count shown in the section header.

7.2 The Assignee's view

Task Detail as seen by the Assignee. Once a task is Awaiting Review, the comment thread locks — notice there's no action button visible here because this particular task is already waiting on the delegator.

While a task is still actively open (before it reaches Awaiting Review), the Assignee can add progress comments, attach evidence or files, mark the task complete from their end, and create sub-tasks underneath it.

7.3 The Delegator's view

Task Detail as seen by the Delegator (the person who assigned the task). Notice the two action buttons at the bottom — *Mark Complete* and *Cancel Task* — which only the Delegator sees.

As the Delegator, you get two clear action buttons at the bottom of the task: "Mark Complete" (green) to close the task from your side once you're satisfied with the work, and "Cancel Task" (outlined, in red text) to terminate it. You can also edit the due date, priority, label, and assignee directly from the field row near the top — just click into any of those fields.

Heads-up on terminology: The status label you'll actually see on screen is "Awaiting Review" rather than the simpler "Open" or "In Progress" wording sometimes used in early planning conversations. Use the on-screen label — Awaiting Review — when talking to your team, so everyone is describing the same thing the same way.

8. Sticky Notes

Sticky Notes are personal, private reminders — never visible to anyone else, regardless of their role or seniority. Access them from "Sticky wall" in the left sidebar, or from the live preview panel on the right side of most screens.

The Sticky Wall — shown here empty. Four live counters track Overdue, Due Today, Upcoming, and Total notes.

8.1 The Sticky Wall screen

At the top, four counters give you an at-a-glance summary: Overdue, Due Today, Upcoming, and Total notes. Below that, an "Action Needed" section surfaces anything urgent, and an "Upcoming" section lists everything else with a future reminder.

8.2 Creating a note

Press the space bar or click the mic button and start telling the app about your reminder - the app will understand your intent and will move to sticky note creation screen automatically OR

Click "+ New Sticky" (top right of the Sticky Wall) or "+ New note" from the right-hand preview panel anywhere in the app.

Creating a new sticky note. Notes render in a handwriting-style font on a colored card, similar to a physical sticky note.

Field	Details
Note text	Free text — this is the only required field. Text renders in a handwriting-style font on the note itself.
Choose color	Five color options for the note's background.
Pin to top	Toggle to keep this note pinned at the top of your wall, above everything else.
Add reminder (optional)	Set a specific date/time to be reminded — this is what feeds the Overdue/Due Today/Upcoming counters.
Created	Auto-filled with the current date and time; not editable.

A note on the note field: The note text box is a large free-text area, not a small input — you can write a few sentences if needed, and the card will still render it legibly in the handwriting-style font shown above.

9. Broadcast Notices

Broadcast Notices are one-to-many announcements posted to a department, a role level, or an entire institution/firm — think of them as the equivalent of a notice-board pin, but digital and trackable. Access them via "My Broadcast Notice" in the sidebar, or "+ New notice" from the right-hand panel.

The screenshot shows the Bolo application interface for creating a broadcast notice. The main area is titled 'Create Broadcast Notice' and contains a text input field for the notice message. Below the text field is a 'Recipients' dropdown menu that is currently open, showing options like 'Entire Institution', 'All Departments', 'Automobile', and 'Civil'. There is also a 'Role level' dropdown and a 'Require' toggle switch. At the bottom of the form are 'Cancel' and 'Publish Notice' buttons. The interface includes a sidebar on the left with navigation options like 'Voice Home', 'Create Task', 'TASKS', 'LABELS', and 'WORKSPACE'. On the right, there is a 'Sticky wall' section with a '+ New note' button and a 'Notice' section with a '+ New notice' button. The top of the interface shows a search bar, user profile, and various status indicators like 'TASKS OPEN', 'OVERDUE', and 'DUE THIS WEEK'.

Composing a broadcast notice. The Recipients dropdown is open here, showing Entire Institution, All Departments, and individual department checkboxes.

9.1 Composing a notice

Field	Details
Notice message	Required. Verified live in this build: a 500-character limit, shown as a running counter (e.g. "76 / 500 characters") under the message box.
Recipients — Departments/Offices *	Required — the field is marked with a red asterisk and the Publish button expects at least one selection here. Options include Entire Institution, All Departments, or individual departments (Automobile, Civil, and so on, scrolling further down the list).
Recipients — Role level	An additional optional filter, used alongside Departments/Offices to narrow the audience further by role.
Require recipients to acknowledge this notice	A toggle switch, defaulting to ON. When enabled, each recipient sees a prompt to acknowledge the notice, and you'll see a running acknowledgement count once it's published.

Once composed, click "Publish Notice" to send it immediately, or "Cancel" to discard the draft. There's no save-for-later draft state visible in this build — a notice is either being composed or already published.

Please confirm with Integrate18 before launch: Two things worth a quick check: first, in this build the "Entire Institution" recipient option was available to a Faculty-level test account, which is broader reach than typically expected for a non-senior role — confirm whether composing a broadcast (and how wide its reach can be) should be restricted by role level before go-live. Second, the 500-character limit and the mandatory Recipients field are both live and working as described above — good numbers to communicate to your team now that they're confirmed rather than "to be decided."

10. Notifications

Click the bell icon in the top bar, from anywhere in the app, to open your Notifications panel.

The Notifications panel, showing a mix of task-completion, comment, and sub-task events grouped by day.

- Tabs across the top — All, Tasks, Broadcasts, Reminders — each with its own unread count, so you can focus on just one category (e.g. only Broadcasts) if your inbox gets busy.
- Each entry names exactly who did what and on which task — e.g. "Yogesh Waghmare marked a task complete — Write up SHA agreement for single-seat...", "...added a comment", "...created a sub-task", "...accepted your task" — grouped under day headers like "Yesterday."
- "Mark all read" (top right) clears your entire unread badge in a single click.
- "View all notifications" at the bottom expands beyond the short preview list shown in the dropdown, into your full notification history.

Tip: Each notification names the specific task it relates to, so you can usually tell what happened without even opening the panel fully — useful for a quick glance between meetings.

11. Labels

Labels let you group related tasks together — for example, a specific compliance cycle, a named client engagement, or a recurring project. They appear in the left sidebar under "Labels," and can be applied to a task from the Create Task form or from within Task Detail.

Creating a new label via "Add new label" in the sidebar.

Field	Details
Name *	Required, up to 30 characters (e.g. "NAAC SSR", or for a CS firm, something like "AGM Season 2026").
Description	Optional, up to 200 characters — useful for explaining what the label covers to teammates.
Color *	Required. Pick a swatch or type a hex code directly (defaults to a neutral grey, #6B7280).

Once created, a label shows up as a small colored dot in the sidebar's Labels section and can be selected from the Label dropdown anywhere it appears — including the Filter panel described in Section 6, so you can pull up "everything tagged AGM Season 2026" in one click.

12. Your Profile

Click your name and photo in the top-right corner, then "Profile & Settings," to view your account details.
